Setup a live stats feed in StatCrew using StatBroadcast Broadcastr

This guide will walk you through configuring StatCrew to connect to StatBroadcast Broadcastr and send live stats to StatBroadcast.

You will need the current version of StatCrew and StatBroadcast Broadcastr installed prior to proceeding. You will also need to create an event in StatBroadcast to transmit to.
1. Open StatBroadcastr and click 'Load new event'
1.1 Login to the app
1.2 Select your event from the list and click 'Load configuration'
2. Click 'Configure StatCrew'
2.1 Confirm that you would like to continue with configuration
2.2 Confirm successful configuration
3. Open Stat Crew Game reports
4. Select a game in Game Reports
Setup a live stats feed in StatCrew using StatBroadcast Broadcastr

1-855-838-2841  https://support.statbroadcast.com  support@statbroadcast.com

4.1
5. From the 'Live' menu, select 'Live setup'
5.1 Click Activate at the top
5.2 Confirm configuration was successful and click OK

These settings should be configured for you, but please confirm the following:

- Auto-copy files should be selected
- The folder listed under 'Target directory' exists on your computer
- Enable XML stats feed should be checked
- XML filename cannot be left blank, should not contains spaces and should not contain the '.xml' extension; any combinations of letters or numbers is sufficient.
- FTP settings: auto-send FTP should be unchecked unless you are actively using TASFTP; if you have ftp site, user id and/or password filled in, you may leave them or remove them
6. **On the Live menu, click 'Send Stats Files' to initialize live stats**

Make sure you have a valid XML license installed in StatCrew.

If this is your first time running live stats on this StatCrew version, you may receive a popup message that says 'XML activated'.

**Note:** If you receive a popup that your 'XML license has expired', you will not be able to run live stats on this version of StatCrew. You will need to either install a new version or obtain an activation code from StatCrew.
When live stats have been successfully activated in Game Reports, a live box score will display on the screen.
7. Return to Broadcastr
7.1 Optional: If you changed any settings on the Live Setup screen, click 'Refresh Loaded Event'
8. Click 'Start Transmitting'
8.1 Check to make sure your transmission started successfully
8.2 From the Options menu, select 'Show stats feed in browser'
8.3 Confirm your stats feed has started in the browser
8.4 Start scoring your game in TAS
